The key for SUMLEV is as follows:

050 = County and/or Statistical Equivalent

The key for YEAR is as follows:

1 = 4/1/2010 Census population
2 = 4/1/2010 population estimates base
3 = 7/1/2010 population estimate
4 = 7/1/2011 population estimate
5 = 7/1/2012 population estimate
6 = 7/1/2013 population estimate
7 = 7/1/2014 population estimate
8 = 7/1/2015 population estimate
9 = 7/1/2016 population estimate
10 = 7/1/2017 population estimate
11 = 7/1/2018 population estimate
12 = 7/1/2019 population estimate
13 = 4/1/2020 population estimate
14 = 7/1/2020 population estimate

Notes: The estimates are based on the 2010 Census and were created without incorporation or consideration of the 2020 Census results. The estimates add births to, subtract deaths from, and add net migration to the enumerated resident population from the 2010 Census. The enumerated resident population is the total population (citizen and noncitizen) with usual residence in the 50 states and the District of Columbia. See https://www.census.gov/glossary/#term_Apportionmentpopulation and https://www.census.gov/glossary/#term_Residentpopulation. The estimates reflect changes to the April 1, 2010 population due to the Count Question Resolution program and geographic program revisions. All geographic boundaries for the 2020 population estimates series are as of January 1, 2020. Median age is

calculated based on single year of age. For population estimates methodology statements, see https://www.census.gov/programs-surveys/popest/technical-documentation/methodology.html An "X" in the 2010 Census field indicates areas that were formed after the 2010 Census. Effective January 2, 2019, two new Alaska county-equivalent areas, Chugach Census Area and Copper River Census Area, were formed from Valdez-Cordova Census Area, Alaska. On that date, Valdez-Cordova Census Area ceased to exist. Values for the April 1, 2010 Census are not given in the dataset for these areas. As a result, the sum of the April 1, 2010 Census 2010 population values for Alaska county- equivalent areas does not equal the 2010 Census value for Alaska, and the sum of April 1, 2010 Census values for all counties and county-equivalent areas in the United States does not equal the 2010 Census count for the United States. The April 1, 2010 Census population of 9,636 for Valdez-Cordova was split into April 1, 2010 estimates base values of 6,684 for Chugach and 2,952 for Copper River, which are given in the dataset

The 6,222 people in Bedford city, Virginia, which was an independent city as of the 2010 Census, are not included in the April 1, 2010 Census enumerated population presented in the county estimates. In July 2013, the legal status of Bedford changed from a city to a town and it became dependent within (or part of) Bedford County, Virginia. This population of Bedford town is now included in the April 1, 2010 estimates base and all July 1 estimates for Bedford County. Because it is no longer an independent city, Bedford town is not listed in this dataset. As a result, the sum of the April 1, 2010 Census values for Virginia counties and independent cities does not equal the 2010 Census count for Virginia, and the sum of April 1, 2010 census values for all counties and independent cities in the United States does not equal the 2010 Census count for the United States. Substantial geographic changes to counties can be found on the Census Bureau website at https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html.
